

## Internal Systems Developer

Total Server Solutions is a cutting edge datacenter & technical services company based in Atlanta, GA. Our goal is to provide the best, fastest, and most complete technical services to our customers. At the moment though, we're missing a key piece of the puzzle. You! We employ some of the best and brightest minds in the tech industry. If you think you'd be a good fit, please read on.

Total Server Solutions is looking for a highly motivated, experienced, knowledgeable developer. Great problem solving skills are a must. As a growing, globally oriented company, we offer a relaxed work environment and great benefits. You can look forward to a challenges and the respect that comes from overcoming those challenges. We look forward to hearing from you!

### **Title:**

## Internal Systems Developer

### **Requirements:**

- Extensive knowledge of PHP5.
- 4+ years experience working as a developer.
- Extensive knowledge of Javascript, CSS, JQuery, and HTML.
- Must be able to work within a team environment utilizing version control systems in a testing and production environment.
- Motivation and ability to quickly learn and adapt.
- Prior experience within a critical production environment.
- Experience working in 24/7 operational environments.
- Expectation to be challenged.
- High degree of independence and exceptional work ethic with exceptional communication skills.
- Must be located, or willing to relocate to Atlanta, GA area.

### **Not Required but a huge plus:**

- Experience with Zend Framework and ORM (Doctrine).
- Experience building Redhat kickstarts.
- Icinga/nconf.
- Jasper Reporting.
- Apache Config / VHOST knowledge.
- Experience configuring Postfix / usage experience (with SQL).
- PowerDNS configuration / usage experience (with SQL).
- Experience in configuring iptables or cisco firewalls.
- Experience with control panel technologies including cPanel, Plesk, DirectAdmin.
- Experience with management tools such as Spacewalk, Puppet, etc.
- Experience with load balancing technologies.
- Experience with Asterix PBX.
- Bilingual.

**What you'll be doing:**

If considered for our Internal Systems Developer position, you will be working to build and maintain the foundation of our intranet and extranet 'portal' application, the core of our business. A successful developer will focus heavily on automation of system tasks and interaction with end users for the requirements needed to execute those tasks. Projects will include massive scalable hosting platforms, DNS management, mail management, hardware inventory control systems, mobile inventory applications. Our chosen candidate will also work on firewall ruleset modification as well as doing work with Asterix PBX systems. We can guarantee that you will not be bored.

**What's in it for you:**

- Competitive Salaries.
- Medical Insurance.
- Paid Time Off.
- Educational Reimbursement.
- Employee Activities.
- Paid Parking.
