

Your business needs power. Total Server Solutions' fully managed servers can give you that power. If you need a full on server of your own but don't wish to be burdened with building it yourself, our fully managed servers are just what you've been looking for.

As a fully managed server client, you'll have full access to your server to do anything you wish. We even provide you with remote reboot capabilities. In the rare circumstance that you need to completely power down and reboot your server, the power is in your hands with our remote reboot services. As with all of our offerings, Total Server Solutions' supremely knowledgeable team of technicians is standing behind you, ready to help you at a moment's notice.

Check out our fully managed server offerings on our website (<http://www.totalserversolutions.com/dedicated-servers.html>). We've got a wide range of servers sure to suit your needs. If you require a custom solution, please ask, we love to build out special solutions for our customers.

All of our servers, come with Total Server Management, at no extra cost.

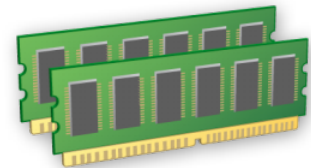

Total Server Solutions has a wide array of CPU offerings to choose from. From dual core single CPUs all the way up through multi CPU/multi core solutions, we can provide all the power you need!

Space may be the final frontier, but it's exactly what you need a lot of! TSS offers you everything from smaller hard drives up to full RAID solutions. If you need an entire universe of space, we can help you with that too with a custom SAN solution. We can meet any need you can think of.

Does your server remember who it works for? If not, you probably need more memory, RAM, that is. All of our fully managed servers have more than enough RAM to get the job done!
